1 Interests

I am intersted in scraping data from Twitter as well as some newspapers' websites to extract some data for my research.

2 Answers to Questions

4. `class(df1) = data.frame`
`class(df) = SparkDataFrame`

5b. There is an error. This is because SparkR does not recognize the data structure.

6b. Once again, there is an error. The reason is the same as above, data structure is the problem.
